Overview

What is Energy Saver mode in an AC system?

Energy saver mode in an AC system is exactly what it sounds like, it is designed to save power or energy. Not all AC systems are equipped with this feature, but the more modern ones do you have it. If you use power saver mode, then your AC will only use a certain amount of power, which in turns saves energy.

What is ECO mode in solar inverter?

ECO (Energy saving) mode The solar inverter works in battery mode, and the load capacity is lower than 10% of the rated power of the inverter, the inverter will start and stop regularly to achieve energy saving effect. When the frequency load is greater than 10% of the rated power of the inverter, the inverter will exit the energy-saving mode.
