## Overview

---

What is Tesla's new energy storage megafactory?

The energy storage Megafactory is the first of its kind built by Tesla outside the US and the company's second plant in Shanghai. Mass production at the factory commenced just eight months after construction began, serving as a new example of "Tesla speed" in China, Tesla said in a press release sent to the Global Times on Tuesday.

Will Tesla energy storage products be exported to Asia-Pacific?

According to a report from the Xinhua News Agency, products from the Tesla energy storage factory will be exported to the global market, including the Asia-Pacific region, providing support for global green development. Potential for cooperation.

How much energy does Tesla store in Shanghai?

The Shanghai facility was built with an initial annual production capacity of 10,000 units. Notably, each Megapack unit can store over 3.9 megawatt-hours of energy -- sufficient to power approximately 3,600 households for one hour. Tesla anticipates a year-on-year increase of at least 50 percent in its energy storage deployments in 2025.

Did Tesla export its first batch of energy-storage batteries to Australia?

SHANGHAI, March 21 (Xinhua) -- Tesla's new Megafactory in east China's Shanghai on Friday exported its first batch of Megapack energy-storage batteries, the company announced. It took the new Megafactory just over a month after its production launch to achieve its first export, with the batteries being transported from Shanghai Port to Australia.
