

# **Environmental project using a 60kWh Tuvalu solar container**

## Overview

---

Does Tuvalu need solar energy?

In response, Tuvalu has prioritized renewable energy as a dual strategy for mitigating emissions and adapting to climate impacts. Solar energy, in particular, is well-suited to Tuvalu's tropical climate, which offers abundant sunlight throughout the year.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What challenges does Tuvalu face?

Tuvalu's geographic and economic context presents unique challenges for energy provision. The nation's dispersed islands, with Funafuti as the capital and most populated atoll, complicate energy distribution and infrastructure development.

Why does Tuvalu need a diesel generator?

Historically, Tuvalu has relied heavily on diesel generators for electricity, a system that is both costly and environmentally unsustainable. The high cost of imported fuel places a significant burden on the national budget, diverting resources from other critical areas such as healthcare and education.
