# European double glass module manufacturer

## Overview

---

What is a glass-glass PV module?

Glass-Glass PV Module In the past and currently, the standard photovoltaic module has been manufactured using 3.2 -4mm glass on the front and a polymer-based insulating back she. ViaSolis is an international manufacturer of PV glass and provider of solar energy solutions. The company operates one of the most advanced production facilities in EU.

Who is EU solar module manufacturing company?

The EU solar module manufacturing company that delivers novel products to solar market. Our development and flexible OEM manufacturing capabilities allow us to create one-of-a-kind design, custom-shaped and sized solar solutions for seamless integration for BIPV projects and IntegratedPV products worldwide.

What is a glass glass solar module?

Glass glass solar module is a long lasting and ultra resistant to any weather conditions Building Integrated Photovoltaics solution. BIPV solar panels can be used as an additional power source and alternative material in architecture to achieve future design for a comparable to standard materials price.

Are PV glass modules a good solution for energy efficient buildings?

These PV glass modules are not only a great and lightweight construction solution for energy efficient buildings. It provides glazing design options and endless possibilities for BIPV designers and architects to implement one of a kind exterior solutions.
