

Fiji Environmental Project Uses Off-Grid Solar Container 120kW

Overview

As part of the Fiji Department of Energy's drive to increase renewable energy deployment and improve energy security, the Global Green Growth Institute (GGGI) and Arizona State University (ASU) have collaborated on the project 'Accelerating Solar Mini-grid Deployment in Fiji' which has completed feasibility studies for solar mini-grids in 75 isolated communities with aim of mobilizing investment for future solar installations. What are the different types of energy solutions in Fiji?

Delivering secure, cost-effective hybrid and utility grade power solutions, for today and the future. Our specialities in Fiji include Solar Energy, Renewable Energy, Hybrid Energy, Distributed Generation, Energy Storage, Off-Grid Energy, Remote Communities, HV, Substations, Grid Connections, Battery Energy Storage Systems (BESS), and Microgrid.

Why do organisations in Fiji switch to solar energy?

Organisations in Fiji choose to go solar for their energy for a variety of reasons, including financial, environmental, and strategic benefits. One of the primary reasons organisations in Fiji switch to solar energy is to save money on their energy bills.

What renewable resources are available to Fiji?

The analysis of data for different sources of energy demonstrates that the potential renewable resources available to Fiji are hydropower, solar energy (photovoltaic and thermal), bioenergy, wind energy, ocean energy, tidal energy and geothermal energy.

How is energy provided in Fiji?

The provision of energy in Fiji is provided through electrical power grids consisting of microgrids installed in Government facilities and community-run in rural areas. Furthermore, diesel generators and solar home systems also are utilized as a way of power providers.
