

Financing for a 5MWh Solar Container Project

Overview

What is a 5MWh energy storage system containerized?

The 5MWh energy storage system containerized is a intelligent monitoring and high protection level, and is suitable for a variety of complex scenarios to meet the energy storage needs of the industrial and commercial sectors, the electric power grid, and renewable energy. The 5MWh energy storage system container consists of 12 energy storage units.

How many energy storage units are in a 5MWh energy storage system?

The 5MWh energy storage system container consists of 12 energy storage units. A single energy storage unit is made up of 1 lithium battery cluster. Due to their high capacity and small size, 3.2V/314Ah lithium batteries make excellent energy storage containers and designs. Each battery cluster is comprised of 4 battery boxes and 1 high-voltage box.

Can a developer buy a solar energy project?

Typically, an entity ("Owner") would acquire a solar energy project from a developer at fair market value. The project would include not only the tangible solar assets but also the contract rights to sell the energy to the off-taker or homeowner (or lease the solar equipment to the off-taker/homeowner).

What is the cost of a 1MW solar project?

With all costs taken into account, a 1MW solar project can cost between \$820,000 and \$1.36 million. The biggest challenge in raising funding is attributed to the large levels of early-stage risk. Returns on the solar project investment are 15.55% on average.
