# Forklift solar container lithium battery pack warranty

## Overview

---

Are lithium ion batteries good for a forklift?

Lithium-ion batteries do not release harmful emissions into the environment, use acid, and have twice the service life when compared to lead-acid powered forklifts. They are also substantially more efficient when charging and discharging and are completely recyclable.

Does Hangcha group offer a warranty on lithium-ion battery packs?

The lithium-ion battery packs found in Hangcha group's material handling equipment are designed to last a long time. Because of this, Hangcha Group offers up to a 10 year or 20,000 hour warranty on our Lithium Iron Phosphate (LiPO4) battery packs. The battery packs will retain at least 80% residual capacity over 4,000 full charges.

How long does a lithium ion forklift take to charge?

The voltage supply is also stable throughout the energy discharge. Both of these lead to longer run times for the end-user. Hangcha Group's lithium-ion forklifts take 2 hours to fully charge compared to charging a lead-acid battery truck for 8-10 hours and allowing it to cool down for another 8-10 hours.

How does a lithium ion forklift work?

The lithium-ion technology also allows for the trucks to run in three-shift environments thanks to opportunity charging. This allows the end-user to continuously run the forklifts for three shifts if they charge the battery during their breaks.
