France's mandatory solar energy storage project

Overview

Can you install solar panels on a parking lot in France?

From pv magazine France The French government has published Decree No. 2024-1023, mandating solar installations on parking lots larger than 1,500 sqm. The provisions define how to calculate the surface areas subject to the rule. They outline exemption criteria and set fines for non-compliance.

What is the solar energy policy in France?

France's solar energy policy has made it profitable, after subsidies, to install and operate PV panels in most parts of the country. This has led to a proliferation of project-development companies that find and secure land and financing to create new installations as a result.

Can a solar power system be used in France?

A solar power system can be used to supply all your energy needs, although in France it's usually combined with an electric or gas heating system, as solar power cannot usually be relied upon year-round for heating and hot water.

Will France cut the national solar deployment target for 2035?

France has opened a final public consultation for the third edition of its Multi-Year Energy Program (PPE) in a revised version that envisages cutting the national solar deployment target for 2035 to 90 GW. Rooftop solar installation in France. Image source: Energies de Loire. PPE3 will be in force for the period 2025-2035.
