

Generator container in Manchester UK

Overview

What is a containerised generator?

With sound proofing by means of the acoustic lined container that is both lockable and weather proof - these are usually installed outside a building in a car park or outside the intake room. Containerised generators are usually larger generators above 500kVA and upward, and are 80dbA @ 1 metres noise level. We can make these even more silent.

Can JPC supply a high power containerised generator unit?

JPC can also supply a high power containerised generator units. Which by widening the ISO container to accommodate a larger generator unit; these larger containerised generator unit can still be lifted into place using standard crane methods with standard locking corner casting positions for road transport.

What size generator housing do I Need?

Standard 40' Sizes (12,192mm) generator housing based on a standard 40' ISO container footprint. Depending on the size of the generator unit installed in the container will accommodate the diesel generator, its fuel tank, the control module and noise attenuation system. JPC can also supply a high power containerised generator units.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system?

Put simply, yes.
