

Georgetown solar Cell Module

Overview

What is Georgetown solar PV Park?

Georgetown Solar PV Park is a ground-mounted solar project which is planned over 710 acres. The project is expected to supply enough clean energy to power 30,000 households. The project construction is expected to commence from 2024. Subsequent to that it will enter into commercial operation by 2026.

Where is Georgetown Solar headquartered?

Georgetown Solar Inc (Georgetown Solar) is a publicly-traded renewable energy company. It is headquartered in Alberta, Canada. This content was updated on 14 October 2024.

What is PV cell and module technology research?

PV cell and module technology research aims to improve efficiency and reliability, lower manufacturing costs, and lower the cost of solar electricity.

What is a solar module?

A solar module—what you have probably heard of as a solar panel—is made up of several small solar cells wired together inside a protective casing. This simplified diagram shows the type of silicon cell that is most commonly manufactured. In a silicon solar cell, a layer of silicon absorbs light, which excites charged particles called electrons.
