Overview

What is a solar pump inverter?

A solar pump inverter, also known as a solar variable frequency drive (VFD), helps in converting the direct current of a solar panel into an alternating current. It drives various AC motor water pumps like a centrifugal pump, irrigation pump, swimming pool pump, and deep well water pump.

Who makes solar pumping inverters?

Solartech is also the world's first manufacturer of the whole series of solar pumping inverters, solar pumps, and solar pumping systems. Solar pumping system technology was adopted in global countries. The research center is located in Shenzhen International Graduate School of Tsinghua University.

Who is the world's leading solar pumping system manufacturer?

World's leading solar pumping system professional manufacturer, solar water conservancy system technology solution provider. Founded in 2001, Solartech is China's leading solar pump manufacturer. Solartech is also the world's first manufacturer of the whole series of solar pumping inverters, solar pumps, and solar pumping systems.

What type of power supply does a solar pump inverter use?

The input can be a solar DC power supply (160-450VDC, 350-800VDC), also single-phase solar pump inverter, or a three-phase AC power supply (220V, 380V, 400V, 460V, 480V), built-in MPPT control system to increase the output power of PV array, ideal for remote and dry areas.
