

# **Government support for energy storage batteries**

## Overview

---

Will doe provide \$291 billion for advanced batteries?

WASHINGTON, D.C. — The U.S. Department of Energy (DOE) today issued two notices of intent to provide \$2.91 billion to boost production of the advanced batteries that are critical to rapidly growing clean energy industries of the future, including electric vehicles and energy storage, as directed by the Bipartisan Infrastructure Law.

Will bipartisan infrastructure law support domestic battery manufacturing & recycling?

Bipartisan Infrastructure Law Will Fund Projects That Bolster Domestic Battery Manufacturing and Recycling to Support Growing Electric Vehicle and Storage Demand WASHINGTON, D.C.

How do government R&D subsidies affect battery manufacturing?

The stronger the subsidy, the stronger the consumer's preference for R&D. Government R&D subsidies can more effectively stimulate the innovation drive of battery manufacturers, thus significantly improving the R&D and innovation capacity of power batteries and increasing the profits of battery manufacturers.

How will a new battery project benefit the United States?

The funding is expected to be made available in the coming months and will ensure that the United States can produce batteries, as well as the materials that go into them, to increase economic competitiveness, energy independence, and national security.
