Guyana substation ups uninterrupted power supply

Overview

Why do I need a DC UPS system?

DC UPS systems are necessary here to supply power to switchgear and telecommunication systems. Our DC UPS systems supply power to the coils or the motorized switchgears. Appropriate battery sizing and charger rating are selected to deliver 10-hour battery autonomy and a maximum of 8-12 hours recharge time.

What is ups & how does it work?

Our highly reliable UPS systems ensure the continuous generation, transmission and distribution of electricity. Our UPS systems are integrated in all kinds of power generation plants, including cogeneration, combined cycle, nuclear, hydro, thermal, wind and thermosolar.

Why do you need an AC UPS system?

Our AC UPS systems supply power to the SCADA system of the substation to ensure permanent supervision and data acquisition (e.g. counting). We design UPS systems for the specific needs of Power and Utilities- delivering the quality, reliability and efficiency that this sector demands.

Why do you need an UPS system?

We also design and install UPS solutions to operate in transmission and distribution substations in order to protect switchgears, switch tripping systems, power transformers and T&D telecommunications.
