

# **Helsinki Mobile Energy Storage Containerized Automated Type**

## Overview

---

Which energy storage technologies are being commissioned in Finland?

Currently, utility-scale energy storage technologies that have been commissioned in Finland are limited to BESS (lithium-ion batteries) and TES, mainly TTES and Cavern Thermal Energy Storages (CTES) connected to DH systems.

What is a containerized energy storage solution?

A containerized energy storage solution makes it easier to ship and transport the storage system to the last mile without much hassle.

What is the future of energy storage in Finland?

Reserve markets are currently driving the demand for energy storage systems. Legislative changes have improved prospects for some energy storages. Mainly battery storage and thermal energy storages have been deployed so far. The share of renewable energy sources is growing rapidly in Finland.

What is a Solax containerized battery storage system?

SolaX containerized battery storage system delivers safe, efficient, and flexible energy storage solutions, optimized for large-scale power storage projects. As the world increasingly transitions to renewable energy, the need for effective energy storage solutions has never been more pressing.
