

Home Solar Power System

Overview

Can solar power my entire house?

One of the most frequently asked questions by homeowners in regard to solar power is, “can it really power my entire house?”

” The answer to that is actually quite simple – yes, solar can indeed power your entire home. But explaining exactly how solar energy can power the entirety of your home is a little more complicated.

Should you buy a solar-powered home?

Homes that are powered by low maintenance, renewable energy sources like solar or wind are in high demand, and prospective buyers are willing to shell out more money for them. One study conducted by the U.S. Department of Energy found that homebuyers are willing to spend an additional \$15,000 or more for a solar-powered home. 5.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.
