### What are the different solar inverter sizes?

Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly. During our research, we discovered that most inverters range in size from 300 watts up to over 3000 watts. In this article, we guide you through the different inverter sizes.

### Do I need an inverter size chart?

The need for an inverter size chart first became apparent when researching our DIY solar generator build. Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly.

### What size RV inverter do I Need?

If you don't want to worry about this, look at your large loads and oversize the inverter so that you have capacity. Most inverters will range between 1,000 watts and 5,000 watts, and you'll probably need an inverter size somewhere in the middle. Many wonder what size inverter they need for their RV and estimate something far larger than necessary.

### Do RV batteries need an inverter?

This is the type of electricity received from the mainstream electrical grid, and it's, therefore, the power your RV receives when you plug it into shore power. This is why you don't need an inverter when you connect to the grid. Your batteries, however, run at 12V DC power.
