

How long can solar panels last

Overview

How long do solar panels last?

That means after 25 to 30 years, most high-quality panels will still generate around 85–90% of their original output. If your panels' output drops below the level promised in the warranty (for example, below 80% after 25 years), you may be entitled to a repair, replacement, or compensation.

Do solar panels need to be replaced after 25 years?

After 25 years, your solar panels won't necessarily need to be replaced; however, their ability to absorb sunlight will be reduced. In this blog, we'll explain how long solar panels last, review solar panel degradation rates, and ways to make sure your solar panels last as long as possible.

When does a solar panel expire?

The "20% rule" refers to the point at which a solar panel has lost around 20% of its original efficiency, usually after 25 to 30 years of use. Panels are generally considered to have reached the end of their warranted life once they drop below 80% of their initial performance.

How can I extend the lifespan of my solar panels?

Here are some tips that can help you extend the lifespan of your solar panels: Investing in a high-quality solar photovoltaic system from a reputable manufacturer like FusionSolar is the first step toward ensuring long-term performance and durability.

How long can solar panels last

How long do solar panels last?

Aug 14, 2025 · The lifetime of solar panels impacts your savings. We answer the question "how long do solar panels last" and what it means for you.

Solar Panel Longevity: The Real Lifespan of PV ...

May 27, 2024 · The quest for sustainable energy has led to the widespread adoption of solar technology, with the lifespan of solar panels becoming a ...

How Long Can Solar Panels Last? Lifespan ...

Aug 27, 2025 · Conclusion Most solar panels last 25-30 years, with gradual degradation over time. Factors like quality, installation, climate, and care ...
