How long does it take to pay for solar panels installed on the roof

Overview

What is a solar panel payback period?

A solar panel payback period is the length of time it takes for the savings on electricity bills to equal the initial investment made in a solar energy system. Before we delve into the payback periods of solar panels, let's discuss how much you could expect to pay for a solar panel system in the UK.

How long does it take to install solar?

The compressed timeline makes it crucial to start the solar shopping process sooner rather than later. Solar installations typically take 2-4 months from initial quote to system activation, meaning homeowners interested in maximizing their savings should begin exploring options immediately. Does solar pay off?

How long does it take for solar panels to pay off?

Below, we explore how these variables interact and what steps you can take to accelerate your return on investment. Most solar panels pay off in seven to 12 years. Geographic location, government incentives and your household's electricity usage impact how quickly your solar investment will break even.

How much does a solar installation cost?

For example, let's assume your solar installation costs \$20,552 after incentives (the average cost on EnergySage). If you spend about \$2,895 annually, or \$241 monthly, on electricity, you'll break even on your solar investment in 7.1 years ($\$20,552/\$2,895 = 7.1$). That's the average payback period on EnergySage.
