

# How long is the battery life of the UPS battery cabinet

## Overview

---

How long do UPS batteries last?

Different UPS battery types vary in lifespan, with sealed lead-acid (SLA) batteries, lithium-ion batteries, and nickel-cadmium (NiCad) batteries each having distinct performance characteristics. Sealed Lead-Acid (SLA) Batteries: These batteries typically have a lifespan of 3 to 5 years. They are widely used due to their cost-effectiveness.

How long does a UPD battery last?

According to the American National Standards Institute (ANSI), “the life expectancy of a sealed lead-acid UPS battery is generally three to five years under normal operating conditions.” ANSI sets standards for UPS systems to ensure reliability and performance. UPD batteries are essential for providing backup power during outages.

What is ups service life?

Service life refers to the next phase a battery's storage life cycle when it is installed in a UPS system and where current flows into the battery. Eaton follows strict standards to manage and maintain UPS battery life expectancy so that once installed, batteries perform to published specifications. Beginning of dialog window.

How long does an ups last?

Most UPS units have a lifespan of three to five years. If your system is approaching the end of its lifespan, it is advisable to upgrade. Third, monitor the performance of your UPS. Frequent battery replacements or inadequate power protection are signs that your system may no longer be effective. Fourth, consider advancements in technology.
