

How many 5G base stations are installed in Cambodia

Overview

Will 5G be available in Cambodia?

KINGTEL has a master plan to build 3,000 base stations of 5G in Cambodia over 2 to 3 years including the first phase of 5G SA core network, transmission network and related technical equipment. It is expected that 5G SA network will be commercially available and accessible for more than 90% of Cambodian population by the end of 2020.

What are the benefits of 5G technology in Cambodia?

The introduction of 5G technology in Cambodia promises numerous benefits across various sectors: Enhanced Mobile Broadband (eMBB): 5G offers ultra-fast data speeds, enabling innovations such as 3D and Ultra HD video streaming, smart home applications, and next-generation gaming experiences.

Will 5G be able to reach 100 Mbps in Cambodia?

By allocating blocks of 100 MHz, 5G in Cambodia could achieve peak download speeds of 20 Gbps and an average download speed of 100 Mbps, significantly improving connectivity. The MPTC has been proactive in expanding 4G infrastructure and securing key radio frequencies.

Will Cambodia support 5G networks in 2023?

In order to support 5G networks, the Cambodian government and mobile service providers have been upgrading the nation's telecom infrastructure. The Cambodian government has set a target of 2023 for the commercial rollout of 5G networks. In order to achieve this goal, the government has allocated 200 MHz of spectrum for 5G use.
