

# How many hydrogen energy stations are there in Peru

## Overview

---

Where can I find information on hydrogen refuelling stations?

LBST has operated the database [h2stations.org](https://h2stations.org) since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and updated continuously from multiple sources on a best effort basis.

How many hydrogen refueling stations are there?

By the end of 2023, there were 1,063 hydrogen refueling stations (HRS) in operation in 35 countries worldwide. The number of stations globally is forecast to increase to 6,080 by 2030, fueled by favorable government policies and rising demand for hydrogen-powered vehicles. The HRS supply chain comprises numerous regional and global operators.

Which country has the most hydrogen refueling stations?

A paid subscription is required for full access. China has the greatest number of hydrogen fuel stations of any country worldwide. As of August 2024, there were 226 operational hydrogen refueling stations in the country. This was followed by South Korea and Japan.

Will hydrogen stations increase in the future?

Alastair Hayfield, Senior Research Director at Interact Analysis, says, "With the growth of hydrogen-powered vehicles and favorable policies towards the market, we expect deployments of hydrogen stations to increase in the coming months and years."
