## Overview

---

What is a battery container?

A battery container is a large, modular enclosure used to house and protect energy storage systems, such as lithium batteries, from environmental factors.

What is a containerized battery energy storage system?

Let's dive in! What are containerized BESS?

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from renewable sources or the grid and release it when required. This setup offers a modular and scalable solution to energy storage.

What is the capacity of pknergy 20ft container 1MWh battery?

PKENERGY's 20ft container 1MWh battery has a rated capacity of 1000kWh. It uses LFP (Lithium Iron Phosphate) batteries and is designed to have a lifespan of over 10 years. The system can operate completely off-grid.

What is a 1MWh Battery Energy Storage System?

A 1MWh Battery Energy Storage System, such as PKENERGY's 20ft container solution, stores energy equivalent to 1 megawatt-hour. It includes 5 clusters connected to a 500kVA power conversion system (PCS) for output at 340-440VAC. The system also includes a 500kW three-phase inverter with a 98.3% conversion efficiency and a 300kW inverter for DC to AC conversion.
