# How many watts are suitable for indoor solar lights

## Overview

---

How many Watts Does a solar light system use?

Most solar lighting systems use fixtures ranging from 20 Watt LED (2000+ Lumens) to 90 Watt LED (9000+ Lumens) and are typically in the 35 Watt to 50 Watt range for most applications. High security or light level requirements use the brighter lights and residential and remote areas use the lower range.

What wattage should outdoor lighting be?

The recommended wattages for outdoor lighting depend on the purpose of the lighting with the maximum recommended wattage at 80. Low- and mid-range wattage lights are also beneficial for different uses.

How many solar watts do I Need?

The number of solar watts you need will depend on the size of your home. To give you an idea, a 2,000 sq foot home uses an average of 32 kWh per day. For this type of household, a 5.8 kW solar system would be needed to generate enough energy to power the entire house. Solar panels are typically sized in kilowatts.

How many watts of light do I Need?

To bathe a small yard or driveway in gentle to moderate light, select a lighting fixture that accommodates 40 to 80 watt bulbs. Many landscape light fixture options fit within this general range, with 60 watts being common.
