

# **How much does 8 kilowatts of solar energy cost**

## Overview

---

How much does an 8kW Solar System cost?

Among the various sizes of solar systems, 8kW solar systems have become a popular choice for medium and large homes and small businesses. An 8kw solar system can generate 32 and 40 kWh of electricity per day, 11,680 and 14,600 kWh per year, and requires 20 400w solar panels, which cost \$11,680 and \$16,800 after tax credits.

How much energy does a 8 kW solar system produce?

An 8 kW solar panel system will produce an average of 700 to 1,400 kWh of electricity per month, depending on your exact home and where you live. One of the biggest factors in how much energy solar panels produce is the amount of sunlight your roof gets.

How much does an 8 kW solar system save?

An 8 kW solar system can save about \$150 on your monthly electricity bill, based on the average electric rate in the U.S. That's nearly \$1,800 per year in solar savings! The exact amount of money that an 8 kW solar system will save varies quite a bit from state to state.

How many solar panels do you need for an 8 kW system?

8 kW solar panel systems generally use between 20 and 22 solar panels and require about 390 square feet of roof space. The number of solar panels you need for an 8 kW system depends on the power rating of the panels. For example, you would need about 23 panels if you used 350 watts.
