

# **How to turn on the Huawei base station power supply**

## Overview

---

What is a Huawei base station?

Let's dive into a technical explanation. A base station, also known as an eNodeB (for 4G LTE) or gNodeB (for 5G NR) in Huawei's terminology, is a piece of equipment that facilitates wireless communication between user equipment (UE) like smartphones, tablets, and IoT devices, and the core network of the telecommunications provider.

What is a base station Power Supply Unit (PSU)?

Power Supply Unit (PSU): This provides the necessary electrical power to operate the base station components. It ensures that all parts of the base station have a consistent and reliable power source. Backhaul Interface: This is the connection between the base station and the core network.
