

# How to turn on the power of solar power generation in base stations

## Overview

---

Do solar panels need to be activated?

Yes, solar panels need to be activated to start generating electricity. Activation involves the necessary steps to connect the solar system to the grid and initiate the conversion of solar energy into usable power. How do I know if my solar panels are turned on?

.

How do I Activate my Solar System?

The process will include: Finding your breaker box and turning on the solar breaker. Turning on your AC Disconnect. Turning on your solar inverter. Connecting the system to your home's wifi. Checking the LED light display to make sure your system is fully activated.

How do I Turn Off my solar panels?

If you do need to turn off your solar panels, you can go through the steps above in reverse, turning off the solar inverter, AC Disconnect, and solar breaker switch. Alternatively, if your system has a rapid shutdown and you're in an emergency situation, you can quickly turn it off with the rapid shutdown system.

How do I connect my solar system to the utility grid?

Connecting your solar system to the utility grid is a critical step in the activation process. Here's what you need to do: Grid Connection Point: Identify where your solar system connects to the utility grid. This is usually located near your main electrical panel or utility meter.
