

# Huawei Mbabane Gravity Energy Storage Project

## Overview

---

Covering 100 km of grid infrastructure, it is the world's first independent microgrid project to be fully powered by solar and energy storage without connection to any power network. Who is Huawei Digital Power Sub-Saharan Africa?

Share. Huawei Digital Power Sub-Saharan Africa has been selected as the exclusive original equipment manufacturer (OEM) partner for the Palabora Mining Company (PMC) solar and battery energy storage system (BESS) project, a flagship initiative led by the Mzansi Energy Consortium and Journey 2 Green (J2G).

What is gravity based storage?

Unlike lithium-ion cells, gravity batteries rely on basic physics instead of rare metals. With renewables booming and AI driving energy demand higher, gravity-based storage offers a geopolitically neutral solution that could stabilize power grids worldwide. Gravity Vault.

What is Huawei digital power?

Huawei Digital Power is dedicated to enhancing the safety and stability of renewable integration by combining digital and power electronics technologies, leveraging technical experience, and collaborating with global power companies, grid enterprises, and electricity providers.

Can gravity storage meet large-scale energy needs without lithium-ion batteries?

This system boasts a peak output of 25 MW and a total capacity of 100 MWh, with an impressive round-trip efficiency of over 80%. The EVx project highlights the potential of gravity storage to meet large-scale energy needs without the environmental and geopolitical challenges associated with lithium-ion batteries.
