

# **Huawei s factory that makes pack batteries**

## Overview

---

Also called Contemporary Amperex Technology Co.Ltd, is a Chinese battery manufacturer and tech firm, specialized in lithium-ion batteries for EVs, energy storage systems, and more. Does Huawei make batteries?

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R&D resources into developing a new solid-state battery tech. The newest patent reveals a battery pack that can go for 1,860 miles away from the plug and fully charge in just five minutes. This is perhaps one of the craziest technologies we've heard so far.

Is Huawei launching a solid-state battery?

Solid-state battery efforts might gain a significant boost from technology giant Huawei. The company patented a solid-state battery with an energy density between 400 Wh/kg and 500 Wh/kg. The battery uses a sulfide-based electrolyte and a lithium-metal anode, promising better ionic conductivity compared to other solid-state battery cells.

Does Huawei have a sulfide-based solid-state battery?

US survey reveals a messy mystery Huawei has filed a patent detailing a sulfide-based solid-state battery design with energy densities between 180 and 225 Wh/lb, roughly two to three times higher than today's typical electric vehicle batteries.

How much power does a Huawei EV battery have?

Assuming a similar efficiency, Huawei's battery should have more than three times the capacity of Lucid Air's pack to achieve the range claim for an EV. That is, about 350 kWh, which at 500 Wh/kg (let's pretend this energy density is achievable at pack level), should weigh more than 1,500 lb (700 kg).

## Huawei s factory that makes pack batteries

---

Taking the global top spot and entering Huawei's supply ...

Jul 17, 2025 · Since 2015, Sunwoda has been laying out plans for solid-state batteries. According to the existing plan, the company expects to build a 1GWh solid-state battery production line ...
