Huawei's megawatt-class energy storage solution

Overview

Instead of simply drawing massive amounts of electricity, the facility uses Huawei's integrated solution that combines smart photovoltaics with grid-forming energy storage to create a "source-grid-load-storage" microgrid. What is Huawei Xingguang megawatt supercharging station?

This facility is built on Huawei's Megawatt Supercharging technology. The Sichuan Yuanqi Xingguang Heavy-Duty Truck Megawatt Supercharging Station serves as a megawatt-class supercharging demonstration site for medium-to-short-distance bulk material transport within Beichuan's sand and gravel mines.

What is a Huawei-made charging station?

Image of a Huawei-made charging station. Huawei China's Huawei has officially launched the world's first 100 MW-class supercharging facility for electric trucks, demonstrating a new era of high-power, ultra-fast charging technology.

What is Huawei supercharging hub?

The new Sichuan supercharging hub, powered by Huawei's Megawatt Supercharging technology, is designed to support the next generation of ultra-fast-charging heavy-duty trucks. The facility is compatible with "3.5C" supercharging models, allowing drivers to add about 62 miles of range in just five minutes of charging.
