Hybrid solar inverter prices

Overview

The latest 2025 solar inverter prices by top brands like Huawei, Growatt, SMA, RENYUAN, and DEYE. Compare models, features, and global trends to make the best choice for your solar project. What is a hybrid inverter?

A hybrid inverter is essentially two inverters in one. It combines a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery, or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

How much does a hybrid solar inverter cost?

Normal inverters can only convert solar DC power to AC for immediate use or grid export, while hybrid solar inverters provide energy management, including storage and backup capabilities. ~Rs. 81,000* for a 3 kW hybrid solar inverter to ~Rs. 93,000* for a 5 kW hybrid inverter. The higher the capacity of the inverter, the more expensive it is.

Should you get a hybrid solar inverter?

Getting a hybrid solar inverter can be worthwhile when you need battery backup, want to shift energy under time-of-use tariffs, or plan to add batteries later. In such cases, a hybrid inverter with a battery and backup wiring can keep essential devices running during outages and intelligently manage solar, battery, and grid power.

How do hybrid solar inverters work?

Hybrid solar inverters use power management algorithms to monitor and control electricity flow between multiple sources continuously. The system uses Maximum Power Point Tracking (MPPT) technology to extract optimal power from solar panels, while managing battery charging and grid interaction.
