

Imported solar cell components

Overview

Where do solar cells come from?

With various tariff battles and AD/CVD cases in effect, it's become more important to know the country of origin for solar cells. Unsurprisingly, most imported silicon solar cells are coming from Southeast Asia. Of note: only 490 kW of solar cells were imported directly from China in 2024.

Can You import solar panels from China?

A somewhat recent regulation in the United States also forbids the import of solar panels and associated components from a certain area in the People's Republic of China. In February 2024, CBP sent a questionnaire to certain companies in the USA requesting details about their supply chains.

Can You import solar panels to generate energy?

Here's what you need to know for importing solar panels to generate energy. Importing solar panels has proven to be a lucrative source of income for savvy United States importers. However, the process of importing these goods can be complicated due to trade actions, tariffs, and bans on imports from certain regions.

Which countries import solar panels?

The Top 4 countries from which the United States imports solar panels are the same four countries in the ongoing AD/CVD investigation: Vietnam, Thailand, Malaysia and Cambodia. Imports from India, Indonesia and Laos are ticking up. Of note: 621.4 MW of panels came from Mexico, and 122.8 MW came from Canada.
