Install a generator in a solar power station

Overview

How do you use a solar power generator?

Solar power generator solar panels are smaller and more portable than on-grid solar system panels, so you can move them around later on fairly easily if you need to. Plug your batteries into the charge controller. Connect the positive and negative cables from the batteries to the positive and negative terminals on the charge controller.

How do I get help installing a solar generator?

If you opt for an EcoFlow solar generator solution, the EcoFlow Support page will help connect you to someone who can help you get up and running or to professional installers (if required). You can also find EcoFlow product manuals and setup guides available for free online. A solar generator prepares you for power outages.

How do I set up a plug-and-play solar generator?

You can set up plug-and-play solar generators in a few simple steps. Let's go over them below. What Equipment Do You Need?

Many solar generators come with all the necessary equipment to get up and running, including a portable power station, solar panel (s), built-in inverter and charge controller, and cables to connect everything.

How do I choose a solar backup generator?

If you only need your solar backup generator to power a few essential items, confirm the energy consumption of each device. Add up everything you need to power, and you can determine what the output capacity of your generator must be. It's crucial to keep in mind that many appliances require more energy to start up than they need to run.
