

ŁOTWA SYSTEM

# Inverter home emergency power supply

## Overview

---

What is an emergency inverter system?

Inverter systems are made up of a set of DC batteries and electronics that can convert the DC power from the batteries into an AC power source needed for the emergency lighting loads. Emergency inverter systems will provide enough emergency AC power for the required time to exit the building if necessary.

Can you use an inverter for emergency back-up power?

Yes, you can use an inverter for emergency home backup power. One way is to have two 12-volt batteries hooked in parallel and one inverter, which will provide enough power to run a refrigerator off and on for a few days depending on the size of the batteries.

How do I use an inverter for emergency power?

A very simple way to use an inverter for emergency power (such as during a power outage), is to use a car battery (with the vehicle running), and an extension cord running into the house, where you can then plug in electrical appliances. More Questions?

(Back to FAQ).

What is a home UPS (uninterruptible power supply)?

Our Home UPS (Uninterruptible Power Supply) is a reliable device designed to provide continuous power to household appliances during electricity interruptions. It seamlessly switches to battery power, ensuring a stable and uninterrupted power supply for essential devices such as computers, routers, and home electronics.
