# Is distributed energy storage in Rotterdam the Netherlands reliable

## Overview

---

Is there a roadmap for energy storage in the Netherlands?

In the Netherlands, there has also historically not been a roadmap or detailed industrial strategy with supportive legislation, policy, taxation reliefs, or investment incentives for the energy storage market.

How much energy storage does the Netherlands need?

To achieve its renewable energy targets, reports in 2021 indicate that the Netherlands will need to install between 29 and 54 gigawatts (GW) of energy storage capacity by 2050. Storage with efficient management systems and digital controls is a crucial element of a reliable, flexible and affordable energy system.

Are grid managers allowed to buy energy in the Netherlands?

Grid managers are not allowed to buy energy on the market themselves in the Netherlands. Examples of regional grid managers are Liander and Stedin. entrepreneurs who want to become active across borders. Prohibits the placing on the market of certain batteries manufactured with mercury or cadmium. Encourages the recycling of (parts of) batteries.

What technologies are developing in the east of the Netherlands?

Focus on three key technologies that are already developing strongly in the east of the Netherlands: electrical energy engineering, electrochemical energy storage and sustainable drive systems. Smart energy Hub: Smart decentralised energy system that produces, stores and uses sustainable energy locally.
