

Juba villa installs solar air conditioner

Overview

How much does a solar AC cost?

We found that the investment in a solar AC generally pays for itself within 10 years of purchase. Angi reports the average homeowner spends \$3,400 on a solar air conditioner. In general, they cost \$1,600-13,000. Mini splits are more affordable, while solar-powered central air conditioners cost more.

What is a solar AC system?

Most solar AC systems are hybrid, meaning they use traditional electricity sources in addition to solar power. Hybrid systems are more popular in very hot environments where it's necessary to run the AC at night (when there's no sun) to keep comfortable. For complete off-the-grid air conditioning, there are solar-only systems.

How does a solar AC work?

In simple terms, solar ACs use solar panels to power the air conditioning system. Solar panels collect energy from the sun. They convert this energy into power. That power either goes directly to the air conditioner or to a battery where it's stored until the AC needs it.

Who makes solar AC?

With Lennox's reputation for cutting-edge technology, we're not surprised they're at the forefront of solar AC. HotSpot Energy makes solar-powered HVAC systems that are worth checking out. The brand hasn't been around for long, but it's Better Business Bureau accredited with an A+ rating. Other solar AC manufacturers include Carisol and GREE.
