# Latest News of solar Glass Factory

## Overview

---

When will solar glass production start?

Production is expected to begin in 2026, with an annual nameplate capacity of between 5GW and 6GW. The project represents a US\$344 million investment. More recently the company signed a supply deal with US chemical producer Genesis Alkali to support the production of solar glass for its Georgia facility.

Can solar glass be recycled?

Solar recycling firm Solarcycle also aims to build a solar glass facility in the US, which would be located in Polk County, Georgia. The facility would use recycled materials from retired solar panels to produce new solar glass, a “first-of-its-kind” according to the company at the time.

Does Canadian premium sand make solar glass?

Solar glass manufacturer Canadian Premium Sand has recently expanded its footprint in Northern America with plans to build a solar glass facility in the US with an annual nameplate capacity of 4GW.

Who has opened a solar glass production line for CdTe thin-film PV?

Glass supplier company NSC Group has opened a solar glass production line to support CdTe thin-film PV manufacturer First Solar.
