# LjHow much does a solar panel cost

Overview

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around $200 to $350 per panel (between $0.80 and $1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from $7,000 to $18,000 to your total solar system costs.

Are solar panels expensive?

No, solar panels in the USA are not considered expensive. On average, a 6.6 kW solar panel system typically costs around $16,000, not considering government incentives and rebates. Solar panel costs in the US usually range from $4,500 to $36,000, or $1.00-$3.60 per watt (W).

How much do solar panels cost per watt?

The average cost per watt for solar panels in the U.S. is $2.84 for residential systems. High-efficiency monocrystalline panels tend to be at the higher end of the price range, but they generate more power with fewer panels—ideal if you have limited roof space.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about $2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.
