

Manila Professional Communications BESS Power Station

Overview

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

What is a Bess & how will it benefit the Philippines?

Marcos said the BESS also holds great potential, not just in terms of generating sufficient, reliable and clean energy that will increase energy affordability, but also in terms of providing "green jobs". The BESS is the first of its kind in the Philippines and one of the largest integrated grid-scale battery energy storage projects in the world.

How many Bess facilities are there in the Philippines?

SMC Global Power is operating 32 BESS facilities across the Philippines, spread across the regions of Luzon, Visayas, and Mindanao.

What is Bess technology?

BESS technology, which enables the storage of energy both from renewable and non-renewable sources, was pioneered in the Philippines in 2016 by what is now SMC's Masinloc power facility. SAN MIGUEL CORP.
