

# Middle East quality solar container battery efficacy

## Overview

---

Why are Saudi Arabia and the United Arab Emirates using battery storage systems?

Saudi Arabia and the United Arab Emirates are taking advantage of falling prices to load up on Chinese-made battery energy storage systems, so they can boost their renewable energy ambitions. Battery storage systems are seen as crucial to integrating solar and wind energy into electrical grids.

Does Saudi Arabia need battery energy storage?

Both will require battery energy storage to support their renewables targets, experts say. Rystad Energy expects Saudi Arabia's battery energy storage capacity to surpass 11 gigawatt hours (GWh) by the end of the year, from zero at the start of 2024.

Will Saudi Arabia have the world's fifth-largest battery storage capacity?

According to the consultancy, Saudi Arabia plans to have the world's fifth-largest utility-scale battery storage capacity, after China, the US, Australia and the UK. A solar facility in Neom, Saudi Arabia, which is planning the world's fifth-biggest battery storage system © Alamy.

What is a 'gigascale' solar & battery project in Abu Dhabi?

Meanwhile, the UAE has launched a "gigascale" solar and battery project in Abu Dhabi, which is planned to provide baseload energy 24 hours a day. The plant will have a 19GWh battery storage system, and is a partnership between utility Emirates Water and Electricity Company and renewables group Masdar.
