

Minsk solar glass size

Overview

What is the size of solar glass market?

Based on type the solar glass market is classified as 3.2mm, 2.5mm, 2.0mm and others. Based on application the solar glass market is classified as single glass module, double glass module and others. "Various Green Benefits and Hazardous Eliminations to Double the Market Share".

What is solar glass?

Solar glass is a specific kind of glass that is intended to collect and produce solar energy. It is sometimes referred to as photovoltaic glass or solar PV glass. It is utilized in many solar applications, particularly solar panels and building-integrated photovoltaics (BIPV).

What are the characteristics of glass for solar applications?

For solar applications the main attributes of glass are transmission, mechanical strength and specific weight. Transmission factors measure the ratio of energy of the transmitted to the incoming light for a specific glass and glass width. Ratio of the total energy from an AM1-5 source over whole solar spectrum from 300 - 2,500nm wavelength.

What is the standard size of laminated Photovoltaic Glass?

The factory standard size of the laminated photovoltaic glass is 1200 mm x 600 mm x 7.00 mm. It is possible to order other dimensions as well. The maximum size that can be ordered is 1200 mm x 3600 mm. The glass thickness increases along with the surface, according to the international standards.
