

Mobile generator power station in New York USA

Overview

How many generators were there at the New York Power Station?

At the time it opened, the power station was 296 feet (90 metres) long and big enough to house five generators that were brought into operation between 1905 and 1906. In 1913, the plant was expanded to 600 feet (183 metres) and five additional generators were added by 1917. The eleventh and last generator was added in 1924.
