

# Mobile power box is charged

## Overview

---

How do you charge a power bank?

Connect one end of the charging cable to the charger, and the other end to the USB input port on the power bank. When the indicator of the power bank flashes it means that the power bank is being charged. If you are unable to charge the power bank, refer to [The power bank cannot be charged or charges too slowly](#).

What does it mean when a power bank is fully charged?

Generally speaking, when a power bank is fully charged all its LED indicator lights are constantly lit. If one of the LEDs is still blinking, it means that the charging process is not yet complete. However, there are several types of charge indicators that you can find on power banks. In this [YouTube video](#) I created you can see some of them.

What if the power bank fails to charge another device?

If the power bank fails to charge another device, refer to [The fast charging or SuperCharge icon does not appear when I charge my phone or tablet with a HUAWEI power bank](#). Connect one end of the data cable to the USB Type-C or USB Type-A port of the power bank and the other end to the phone or tablet.

Do portable chargers have safeguards?

In addition to this readout, many portable chargers have safeguards in place which help protect the batteries in cases of overcharging and overheating, so you can keep your portable charger or power bank in its outlet without fear of causing significant damage to said charger.
