

# **Mozambique 20W solar panel construction**

## Overview

---

Who built Mozambique's first large-scale solar power plant?

Capital and expertise from Scatec Solar, KLP and Norfund enabled the construction of Mozambique's first large-scale solar power plant. Central Solar de Mocuba (CESOM) provides over 79 GWh of electricity annually, which is equivalent to the electricity consumption of more than 170,000 households in Mozambique.

How is Mozambique diversifying its energy mix?

Mozambique is diversifying its energy mix by inviting private power project developers to sell electricity to the state-owned national power utility, Electricidade de Moçambique (EDM), a 25-year power purchase agreement (PPA) to EDM. The output of the study will be independent power producers (IPPs). This Model Business (PPA) to EDM.

What is central solar de Mocuba?

Central Solar de Mocuba has increased Mozambique's energy generation capacity by 40 MW and will produce approximately 79 GWh per year. The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid.

How will Mozambique's power plant's strategic location affect the grid?

The project's strategic location will reduce energy transmission losses and improve the security of energy supply in northern Mozambique and stabilize the grid. It is estimated that the power plant's connection to the EDM grid will result in a seven percent improvement in the network default level.
