# New Energy Battery Cabinet Replacement Conditions

## Overview

---

How to protect a lithium battery energy storage cabinet?

At the same time, setting the charging and discharging parameters, configuring the safety and protection settings, and protecting the lithium battery energy storage cabinet from potential dangers such as overcurrent, overvoltage, and overtemperature are necessary.

How do I know if my energy storage system is safe?

Start by visually inspecting the entire energy storage cabinet, including the cabinet, battery modules, electrical connections, and related components. Check for any physical damage that may affect the integrity and security of the system.

How do you protect a battery cabinet?

High-quality cables, connectors, and terminals establish safe electrical connections between battery cabinets and other system components. And add appropriate fuses and circuit protection devices to the circuit to prevent overcurrent, overvoltage, and short circuits.

What kind of batteries does NPP cover?

NPP Vietnam factory in construction since 2016, totally cover an area of one hundred acres. NPP covers whole series of Sealed Lead Acid Batteries, Which include general type, Deep cycle type, Gel type and etc, And also whole series of Lithium Batteries and cells. If playback doesn't begin shortly, try restarting your device.
