# New Energy Charging Base Station Stocks

## Overview

---

Should you invest in EV charging station stocks?

Investing in EV stocks that operate charging infrastructure can provide a more affordable way to invest directly in power stations. If you don't own property to install EV chargers, there are EV charging station stocks that you can invest in.

Are EV charging stocks on the rise?

Even now, as the EV market is on the rise, you can find companies who exclusively create electric cars or are moving to make their whole fleet electric in the list of best automotive stocks on MarketBeat. As these cars become more common, it's natural to expect EV charging stocks to become more mainstream.

How much do EV charging stations cost?

In addition, if you own a commercial space such as a shopping mall, apartment community, etc., installing charging stations gives you an advantage over comparable businesses. However, each station may cost upwards of \$2,600 to install. Are EV charging stations profitable?

Who makes EV charging equipment?

Blink Charging Co., through its subsidiaries, owns, operates, manufactures, and provides electric vehicle (EV) charging equipment and networked EV charging services in the United States and internationally. The company offers residential and commercial EV charging equipment that enable EV drivers to recharge at various location types.
