New Energy Plus Energy Storage Business Model

Overview

With the proposal of the “carbon peak and neutrality” target, various new energy storage technologies are emerging. The development of energy storage in China is accelerating, which has extensively promoted t.

Are energy storage business models fully developed?

Though the business models are not yet fully developed, the cases indicate some initial trends for energy storage technology. Energy storage is becoming an independent asset class in the energy system; it is neither part of transmission and distribution, nor generation. We see four key lessons emerging from the cases.

How to develop energy storage business model in China?

In order to guide the development of energy storage business model, it is recommended to improve policy formulation in terms of planning, technical standards, market and regulatory mechanisms. In the planning stage of the power system, the Chinese government should consider the safety, economic and social benefits of energy storage.

Is energy storage a new business opportunity?

With the rise of intermittent renewables, energy storage is needed to maintain balance between demand and supply. With a changing role for storage in the energy system, new business opportunities for energy storage will arise and players are preparing to seize these new business opportunities.

Can energy storage be a new composite business model?

Due to its flexibility, energy storage should be widely used in competitive models. The spot market is used as the carrier, and the energy storage in each application scenario is uniformly deployed through the shared energy storage business model. It can serve as a new composite business model for energy storage.
