New Energy Storage Foreign Trade

Overview

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Is China ready for a new energy industry?

Lauding China's efforts to develop the new energy industry, including the energy storage sector, Tesla Vice President Tao Lin in May told Xinhua that the country offers a complete industrial chain, vast market potential, and a production and business environment crucial for enterprise growth.

How successful is Tesla's Energy Storage Technology?

Tesla's energy storage technology has already achieved a high level of commercialization and market success in the United States, said Liu Qing, vice president of the China Institute of International Studies.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.
