# Off-grid pricing for foldable containers used on islands

## Overview

---

What is an off-grid system?

An OFF-Grid system generates its own island grid and is not dependent on a public power grid. It is mostly used for remote off-grid locations, in combination with energy storage and other generators. Possible locations are therefore remote villages, development and crisis areas, mining, venues or deployments in extreme weather events.

What is the difference between on-grid and off-grid?

The ON-Grid system is used in combination with other energy generators and is suitable for use in private individuals, in agriculture, on construction sites, in hotels, in energy communities, in municipalities or even in industry. An OFF-Grid system generates its own island grid and is not dependent on a public power grid.

What is a solarcontainer?

Solarcontainer explained: What are mobile solar systems?

The Solarcontainer represents a grid-independent solution as a mobile solar plant. Especially in remote areas it can guarantee a stable energy supply or support or almost replace a public grid with strong power fluctuations, as well as diesel generators that are used.

Why should you choose LZY solar panels on shipping container?

Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability. Sensitive solar arrays can be effectively protected from storms, vandalism and all possible threats. What is LZY's mobile solar container?
