Off-grid solar-powered container for oil platforms 30kW

Overview

The PFIC30K64P30 is a compact all-in-one solar storage system integrating a 30kW power output, 64kWh energy storage capacity, and 30kWp high-efficiency foldable PV modules—engineered for off-grid, remote, and temporary power scenarios. What is an off-grid 30kW Solar System?

An off-grid 30kW solar system consists of solar panels, a solar inverter, and a battery among other necessary gadgets. The battery, which is sufficiently powerful to run up to 24 kW load, stores the extra power generated by the solar panels to make it useful in the future.

What is a self-storing solar power system?

This process allows us to provide solar power solutions with quick turnaround and short lead times from inception to installation. This collapsible, self-storing systems was a collaborative effort between our engineering design team and engineers from one of our oil services customers. Self-storing solar power systems ready for transport.

What is a solar power generator?

A silent, worry-free alternative to loud and dirty diesel generators to meet high off-grid power needs using solar power generation – with optional wind turbine (s) for augmented power generation day and night. Harvested power stored in a choice of batteries including Lithium Ion, EV Second Life Batteries, and deep-cycle AGM batteries.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.
