# Ordinary lead-acid battery with inverter

## Overview

---

Do you need a lead-acid battery for an inverter?

While lead-acid batteries are commonly used in cars, you need a lead-acid battery specifically designed for use with inverters to power your microwave, fridge, and other appliances. Inverters provide small amounts of power over a long time and only inverter batteries provide the AC current needed to power your appliances when you are off-grid.

What are the different types of batteries for home power inverters?

Batteries are the backbone of any residential energy storage system, providing backup power when needed. The most common battery types for home power inverters are lead-acid and lithium-ion. Understanding the benefits and limitations of each will help you make an informed decision based on your power needs. Lead-Acid Batteries.

What are the different types of solar inverter batteries?

The most commonly used batteries for solar inverters are lead-acid and lithium batteries. Inverter batteries come with different chemistries and technologies, with lead-acid batteries containing four parts made of lead.

Are acid-lead batteries still commonly used?

Although acid-lead batteries are being replaced by newer lithium battery technology due to disposal issues, acid-lead batteries are still the most popular batteries for inverter use.

## Ordinary lead-acid battery with inverter
